## MANAGEMENT DISCUSSION & ANALYSIS

### A. EXPORT SECTOR & STRATEGY

The cumulative engineering exports from India during the year 2015-16 saw a 15.85 per cent fall as compared to the corresponding period of the previous year. This downward trend falling for the 16<sup>th</sup> month in a row was due to contraction in shipments of petroleum and engineering goods amid tepid global demand. The trend in falling exports is in line with other major world economies of US, European Union, China, Japan, etc.

The outlook for Indian exports in 2016-17 is expected to remain weak due to continued moderation in growth in China and the general slowdown in emerging markets economies. However bright spots for Indian exports are expected to show some moderate upturn where economic growth is expected. The improved outlook and pro-active policies of the Government will help boost exports and bring India on the trajectory of greater economic growth.

Growth in the volume of world trade is expected to remain sluggish in 2016 at 2.8%, unchanged from the 2.8% increase registered in 2015. WTO economists report the projected rise of global trade growth to 3.6% in 2017. While the volume of global trade has been rising, its value has fallen because of shifting exchange rates and fall in commodity prices. This could undermine fragile economic growth in vulnerable developing countries.

The key driver for increased engineering exports has been the shifting of global manufacturing bases to countries such as India that offer lower costs and good engineering aptitude.

Products are the major thrust area of exports for the future growth in turnover of the Company. Projects have been implemented on turnkey basis without cost and time overrun that involved supply of machines and equipment, installation & commissioning, training in India in the reputed established institutions and on-the-job training at project site by HMT(I) experts besides technical assistance in management.

The Company has requisite experience and capabilities in the following areas, which are offered to developing and under-developed countries under MEA assisted programmes.

1. Entrepreneur & Technical Development Centre
2. Vocational Training Centers

3. Information Technology Centers
4. Small & Medium Enterprises Development Centre
5. Tool Rooms for Engineering manufacturing establishments
6. Common Facility Centre
7. Workshops/Laboratories for Engineering / Educational Institutions
8. Agricultural Development Projects
9. Setting up of Mineral water projects
10. Lamp chains

In the area of Technical Training, the Company has carved a niche for itself by setting up various Vocational Training Centers, Advanced Training Centers, Entrepreneur Technical Development Centers and IT Training Centers geared to meet the technical skill and infrastructural needs of the Country and engineering industry complexes.

**E. OUTLOOK**

Presently the Company is exporting Machine Tools, which forms a small quantum of its business, only to Middle East and African countries. It is necessary for the Company to explore new markets to increase its sales. Sri Lanka, Nepal, Bangladesh emerge as key markets for Indian engineering exports. South East Asian market is attractive in terms of export of Machine Tools. This market depends mainly on imports to meet its machine tools equipment demand. Marketing of Machine Tools manufactured by other Indian manufacturers will be considered wherever HMT Machine Tools Limited is not able to meet the technical or commercial requirements. The company would tie-up with export organizations and Companies to widen the basket for marketing project expertise.
